Help slow the spread of disease and keep your employees safe through sanitization methods and temperature readings.

Pandemic Response - The New Normal

Should grocers check customers' temperatures? One Connecticut chain thinks so

"It's not 100%, but it's more than my competition is doing, that's for sure," Bob LaBonne Jr., president and CEO of LaBonne's Markets, told Grocery Dive.

The Home Depot Distributes Thermometers For Employee Temperature Checks, Limits In-Store Shoppers

KEY POINTS

- Walmart and Amazon will take the temperature of all employees when they report to work. Others are distributing thermometers to check for fever at home.

The nation's largest employers are turning to thermometers as a new line of defense against the coronavirus.

At [Walmart](#) and [Amazon](#) facilities across the country, hundreds of thousands of employees will soon get their temperature taken when they report to work. [Home Depot](#) is [giving its employees thermometers](#) and asking them to check for a fever at home. [Starbucks](#) is sending thermometers to stores to allow employees to do voluntary self-monitoring. And grocery delivery company Instacart is distributing a health and safety kit to its contract workers, including a reusable cloth face mask, hand sanitizer and thermometer.

In the U.S., the pandemic's outlook has become more dire. There are [at least 278,458 confirmed cases](#) of COVID-19, according to data compiled by Johns Hopkins University. On Tuesday, White House officials projected there would be between [100,000 and 240,000 deaths in the U.S.](#)

Grocers and essential retailers have changed the way they operate and added more safety precautions, from handing out hand sanitizer to installing plexiglass screens. They have been criticized, in some cases, by [workers who say they're not doing enough](#). And the companies have been directly affected by the pandemic, too, as some of their own employees have gotten sick, and they've had to close and clean warehouses and stores.

CORONAVIRUS

Gov. Mike DeWine asks Ohio businesses to take temperature of employees daily to help screen out the sick

CDC 24/7: Saving Lives, Protecting People™

Interim Guidance for Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19

To ensure continuity of operations of essential functions, CDC advises that critical infrastructure workers may be permitted to continue work following potential exposure to COVID-19, provided they remain asymptomatic and additional precautions are implemented to protect them and the community.

A potential exposure means being a household contact or having close contact within 6 feet of an individual with confirmed or suspected COVID-19. The timeframe for having contact with an individual includes the period of time of 48 hours before the individual became symptomatic.

Critical Infrastructure workers who have had an exposure but remain asymptomatic should adhere to the following practices prior to and during their work shift:

- Pre-Screen:** Employers should measure the employee's temperature and assess symptoms prior to them starting work. Ideally, temperature checks should happen before the individual enters the facility.
- Regular Monitoring:** As long as the employee doesn't have a temperature or symptoms, they should self-monitor under the supervision of their employer's occupational health program.
- Wear a Mask:** The employee should wear a face mask at all times while in the workplace for 14 days after last exposure. Employers can issue facemasks or can approve employees' supplied cloth face coverings in the event of shortages.
- Social Distance:** The employee should maintain 6 feet and practice social distancing as work duties permit in the workplace.
- Disinfect and Clean work spaces:** Clean and disinfect all areas such as offices, bathrooms, common areas, shared electronic equipment routinely.

INTERIM GUIDANCE

This interim guidance pertains to critical infrastructure workers, including personnel in 16 different sectors of work including:

- Federal, state, & local law enforcement
- 911 call center employees
- Fusion Center employees
- Hazardous material responders from government and the private sector
- Janitorial staff and other custodial staff

Workers – including contracted vendors – in food and agriculture, critical manufacturing, information technology, transportation, energy and government facilities

ADDITIONAL CONSIDERATIONS

- Employees should not share headsets or other objects that are near mouth or nose.
- Employers should increase the frequency of cleaning commonly touched surfaces.

Non-Contact Infrared Thermometer

Instantly takes temperature from a distance without contact.

PGA 4 Pack
Cost: \$279.00 Delivered
UPC: 810011122314
Lead Time: 14 Days

Non-Contact Infrared Thermometer JXB-187

This infrared thermometer provides an accurate temperature reading in only one second without coming into contact with the patient. This is used at hospitals for its convenient and hygienic operation. It provides readings from the forehead comparable to oral thermometers and displays the results on a backlit LCD in either Fahrenheit or Celsius. Stores up to 32 readings and has an audible alarm alerting you when a person is running a fever. This thermometer can also be used to measure the temperature of rooms, objects, and liquids. Features a 30-second automatic shut-off.

Requires two AA batteries

★★★★★ **Excellent Thermometer!**

Bought another thermometer before this and it is useless...registers different numbers and is not dependable. This one, however, is great! Easy to use, light weight, and DEPENDABLE. A very good product and one I recommend.

- Quick & accurate 1 second testing
- Touchless – Take the body temperature with a 1.2 – 2” distance from the forehead
- Reliable & stable measurement with infrared detection system
- Audible alarm if temperature is more than 100.4° (38° C)
- Memory of last 32 temperature measurements
- Temperature display in either Fahrenheit or Celsius
- Automatic power-off / Two AA batteries
- U.S. & Europe Certification
